

Teachable Moments

**Need safe, accurate patient education info?
Don't surf the internet! Turn to a trusted source:
The MGH/Partners Intranet**

The internet can be a great resource for many things, but there's no guarantee that the health information you find will be accurate, safe or meet our patients care standards.

Luckily, great resources are still just a click away on the MGH/Partners intranet. These resources are produced internally by MGH clinician content experts and externally by trusted agencies such as NIH using clinical evidence and best practices.

- **From your desktop:**
Go to Start → Partners Applications → Clinical References → Partners Handbook
Look in the left hand column and click on the "Patient Education Info" link.
- **From CAS:**
On the left hand side of the screen, click on "Partners Handbook" or "Knowledge Link."
- **From eMAR:**
Click on "Knowledge Link" located beside every medication order.
- **From your home computer:**
Go to: <http://www.nlm.nih.gov/medlineplus/>
Advise patients and families to use this site for health-related information.

For more information or guidance, please call us:
