Iftar at MGH

a family affair

breaking fast, building friendships, and honoring an ancient tradition

Ellison 18 patient care associate, Aomar Nait-Talib, and his two daughters, Acia (center front) and Sarrah (left), and their cousin Ibtissam Daif (center back), break fast under the Bulfinch tent along with hundreds of other members of the extended MGH community.
Debbie Burke

eCare and the Staff Perceptions of the Professional Practice Environment Survey — we heard you; we’re on it

The Staff Perceptions of the Professional Practice Environment Survey is one of the most effective tools we have for hearing directly from staff about issues that need improvement. The results of the most recent survey were especially instructive.

There was widespread agreement that certain aspects of Partners eCare present a challenge for staff. Ann Marie Dwyer, RN, director of PCS Informatics, and her team have been conducting eCare rounds on inpatient units to gain a better understanding of the issues affecting satisfaction.

- **Signed and held orders**—duplicate orders or orders not released during the intended phase of care — create a cluttered view of the orders section making it difficult to see active orders and slows down the care and discharge process.

- **Navigating the Chart**—nurses were finding it difficult to navigate multiple pages and flow sheets to find the information they needed.

- **Difficulty logging in**—staff was experiencing frustration at the amount of time it took to log in and access certain applications.

A multi-disciplinary work group has been formed with nurse and physician leaders from inpatient and procedural areas. The group is developing guidelines for best practices around signed and held orders.

The PCS informatics team has begun sharing best practices on the use of index reports which greatly streamlines the navigation process.

With representation from Partners IS and MGH staff nurses, Meghan Roche-Laputkas, RN, and Emily Doyle, RN, an inter-disciplinary work group conducted an assessment to evaluate the issue in real time. As a result, a number of devices have been replaced or refurbished, and PHS IS continues to work with us to improve the log-in experience.

I want to thank everyone who participated in the Staff Perceptions of the Professional Practice Environment Survey for sharing their insights and observations. It’s only through open communication that we can continue to address and improve issues as they arise.

Debbie Burke, RN
senior vice president for Nursing & Patient Care Services and chief nurse
Cronin elected president of ANA Massachusetts

Julie Cronin, RN, nursing practice specialist for Gynecology-Oncology and Radiation Oncology, was elected president of the Massachusetts chapter of the American Nurses Association at the organization’s annual meeting in Dedham, April 6, 2018.

Cronin, named 2013 GEM Nurse of the Year by Nurse.com, is a highly respected expert in her field. She is active on several hospital committees, has contributed to the literature in oncology nursing, and has presented locally and nationally on a number of topics.

Says Cronin, “I’m truly honored to be president-elect of the American Nurses Association Massachusetts, the organization that represents all nurses in the state regardless of specialty, years of service, or role. Members range from bedside nurses to chief nursing officers, and all are essential to the strength and future of the profession. Given the issues we’re facing in health care, it’s imperative to have leaders who are fair, honest, and authentic. I believe I can bring those qualities to my role as president. I am beyond proud, and I hope to be a strong, positive voice for nurses in the years to come.”
Pain-Management

Multi-disciplinary team addresses ongoing opioid shortage

— submitted by the Opioid Shortage Nursing Work Group

Due to the nationwide shortage of intravenous opioids, MGH nurses are working with colleagues to minimize disruption of care and ensure patients receive effective pain-management. A broad coalition of experts from throughout the hospital is developing strategies to address the shifting availability of IV medications. The group is:

- anticipating the clinical impact of shortages and implementing new and revised processes
- identifying and disseminating conservation strategies
- developing educational tools and resources to ensure safe patient care
- sharing organizational learning and success stories
- raising awareness of available non-opioid and supplemental pain-management strategies to provide effective pain relief

The group meets regularly for updates on the availability of medications. While this multi-disciplinary approach has been effective, it’s unclear how long the shortage will continue. The team is monitoring and adapting to the situation as needed and communicating updates to the MGH community. Staff should:

- understand that pain is a physical and an emotional experience and their respective interventions may differ
- be aware that there are a number of pain-relief options, including massage, moist heat, ice, and re-positioning. Relaxation and distraction strategies such as focused breathing, prayer, and meditation can also be employed
- consider other treatments such as massage therapy, acupuncture, and pet therapy

Caregivers continue to work to evaluate and manage pain and create a safe, individualized plan for each patient.

For more information, contact Patti Shanteler, RN, staff specialist, at 617-643-2995.

Tools and resources are available on Apollo under Partners Applications —> Utilities —> MGH Apollo —> Opioid Shortage (or Google MGH Apollo).
DEU Celebrates 10-year anniversary

— by Martin Lantieri, senior specialist

The White and Ellison 7 dedicated education units (DEUs) marked their 10th anniversary, April 26, 2018, with a celebration in the Haber Conference Room. A partnership between MGH and the University of Massachusetts, the DEU model utilizes staff nurses as clinical instructors working with nursing students during their junior year. University faculty round regularly to support, coach, and mentor, ensuring that learning goals and clinical coursework are successfully completed.

Studies show significant advantages to learning in a DEU setting. Graduates report higher confidence in clinical skills, better ability to prioritize care, and less difficulty communicating with colleagues once they begin practicing on their own.

Staff nurse, Brenda Pignone, RN, notes that, “The DEU prepares students for transition to practice by contributing to higher competency, lower stress, and better job satisfaction.” Pignone is conducting a study comparing DEU graduates to other new graduate nurses as they move from novice to advanced beginner.

Merrill Farrell, RN, a graduate of the inaugural DEU class and clinical instructor, says, “The DEU addresses the education-practice gap by capitalizing on the expertise of clinicians and faculty.”

Nursing director, Theresa Capodilupo, RN, who, with Gaurdia Banister, RN, executive director of The Institute for Patient Care, helped launch the program, touted the sustainability of the program saying, “Graduates are now becoming clinical instructors themselves and are excited to support the development of other students.”

Since 2008, the units have educated 350 juniors, and 250 seniors have completed their clinical capstones in the DEU. Approximately 50 students have been hired as patient care associates with more than 30 transitioning into nursing positions. At least 25% of those hired went on to receive master’s degrees; one graduate is currently enrolled in a master’s-to-doctor of nurse practitioner program.

For more information about the dedicated education unit model, call Marty Lantieri, senior specialist, at 617-643-5601.
Teamwork, Trust, and Teaching

Proud to work and teach at MGH

— by Casandra McIntyre, RN, staff nurse

As a staff nurse on the Phillips 21 Gynecology-Oncology Unit and a graduate of Simmons College School of Nursing, I’ve had the opportunity to precept many students and new nurses with the support of my nursing director, Adele Keeley, and nursing practice specialist, Julie Cronin. I began by teaching a Health Assessment class of nine students at Simmons, which I greatly enjoyed.

Then, when another instructor at the school became ill and unable to finish teaching her clinical, I was asked to fill in for her. With the encouragement of my nursing director, I arranged to hold the clinical on our unit as exposure to the clinical setting is so important for nursing students. This required some scheduling negotiations as another nurse on our unit was also teaching a clinical.

My students ended up working a modified evening shift. They came in at 9:00am, read up on our patients, attended nursing rounds, and helped PCAs with tasks like taking vital signs. They took report from the morning students, which allowed both groups to experience giving and receiving report.

They worked with patients throughout the afternoon, participated in report with the night nurses, and attend a post-shift conference at 9:00pm. All the nurses on Phillips 21 were so supportive of the students, taking every opportunity to teach them, augmenting my instruction.

This kind of unique cooperation and problem-solving is what makes MGH nurses and nursing leadership so special. The confidence my nursing director and nursing practice specialist had in my ability to teach was motivating and gave me the extra push I needed to say, “Yes.” And the support of my colleagues on Phillips 21 made it an exceptional learning experience for my students.

During the week of the Magnet re-certification site visit, I had the privilege of being asked to be a Magnet escort. The visit fell right in the middle of my clinical teaching rotation, which meant I wouldn’t be available to teach that day. But thanks to the wonderful support of my colleagues, I was able to place my students on other units for job shadowing experiences.

During the week of the Magnet re-certification site visit, I had the privilege of being asked to be a Magnet escort. The visit fell right in the middle of my clinical teaching rotation, which meant I wouldn’t be available to teach that day. But thanks to the wonderful support of my colleagues, I was able to place my students on other units for job shadowing experiences. June Guarente, Charlene O’Connor, and Doris Grillo were extremely gracious in finding educational opportunities for my students.

Phillips 21 made it an exceptional learning experience for my students.

I taught another clinical group during the spring semester, and I’m already looking forward to starting again this summer. I’m proud and eager to show my new students the superb nursing practice and education we deliver at MGH every single day.
National Health Care Decisions Day was instituted to raise awareness around advance care planning. Copies of all forms and other educational materials are available in The Blum Patient & Family Learning Center. The Excellence Everyday Ethics Portal Page is also an excellent source of information.

To learn more about advance care planning, contact Cynthia LaSala, RN, EICPC advisor, at 617-724-6010, or call the Blum Center, at 617-724-4410.

On April 25, 2018, the PCS Ethics in Clinical Practice Committee (EICPC) hosted its 18th advance care planning booth for patients, visitors, and staff. Successful advance care planning often starts with a single conversation. The booth gives visitors an opportunity to begin that conversation with a caring and knowledgeable healthcare professional.

EICPC champions provided consultation and resources, including copies of the Massachusetts Health Care Proxy form; Medical Orders for Life-Sustaining Treatment (MOLST) forms; the MGH patient-education handout, Preparing in Advance for Your Healthcare; the Massachusetts Department of Public Health brochure, Know Your Choices: a Guide for Patients with Serious Advancing Illness; Five Wishes forms; and information on organ donation. (The MOLST form is a medical order used to indicate preferences regarding a patient’s desire for life-sustaining treatments such as CPR, dialysis, or breathing tubes.)

Members of the PCS Ethics in Clinical Practice Committee staff annual advance care planning booth. Pictured l-r, back to front): Brian Cyr, RN; Vita Norton, RN; Cynthia LaSala, RN; Gail Alexander, RN; Jennifer Alvis, RN; and Sarah DiDonatis, RN (ED Boarder Program).
MGH hosts annual Iftar

Muslim community turns out in great numbers

It’s hard to imagine a warmer, more welcoming, multi-cultural event than the annual MGH Iftar, held May 30, 2018, under the Bulfinch tent. Iftar is the evening meal where Muslims end their daily fast during the Islamic month of Ramadan, and this year's event drew families from Iran, Iraq, Afghanistan, Syria, Saudi Arabia, Nigeria, Greece, Palestine, Bangladesh, Egypt, Morocco, Turkey, India, and Pakistan.

Firdosh Pathan, organizer of the event for the past 19 years, noted, “It’s gratifying for Muslim employees to be recognized and celebrated during our Holy month of fasting. This annual event is so meaningful and empowering for our Muslim colleagues.”

Middle Eastern dishes were provided by Nutrition & Food Services. Imam Elsir Sanousi, Rabbi Ben Lanckton; members of the Spiritual Care Department; Jeff Davis, senior vice president for Human Resources, and Deb Washington, RN, director of PCS Diversity, were all in attendance.

Said one guest, “It was a special day, celebrating Iftar with Muslims from all over the world and MGH staff from all different faiths — like one big, global family.”

The Masjid (Muslim prayer room) is located in Founders 109, where patients, family members, and staff can pray 24 hours a day, seven days a week. Friday prayer is held in the Thier Conference Room at 1:00pm. The Spiritual Care Department can assist with any Muslim patient needs. Call 617-726-2220.
Annual Observance (continued)
On Monday, May 21, 2018, the MGH Executive Committee on Teaching and Education (ECOTE) held its second inter-professional education symposium. The planning committee, led by Robert Birnbaum, MD, and Gaurdia Banister, RN, spearheaded the effort to bring renowned healthcare educators to the table.

MGH president, Peter Slavin, MD, and Keith Lillemoe, MD, chair of ECOTE, welcomed 125 participants and keynote speaker, Ian Curran, vice dean of Education at Duke-NUS Medical School in Singapore. Curran gave a thought-provoking talk on the need to strive for excellence in healthcare education. Breakout sessions were led by local and national authorities on inter-professional learning and collaborative practice; teaching strategies for a multi-generational workforce; and diversity and inclusion in healthcare education. One session was a hands-on workshop for creating learner-centered presentations.

Said Banister in her comments, “We hope that by the end of the day, you’ll feel connected with and committed to a community that seeks evidence-based, innovative teaching methods.”

That sentiment was echoed by attendee, Maureen Hemingway, RN, who said, “The ECOTE symposium was great because it brought the multi-disciplinary healthcare team together with a common purpose—to spend the day immersed in topics that are current and relevant. I’ve already incorporated ideas that I learned into my practice.”

For more information, contact Sara Midwood, at 617-724-2789.
Communicating Risk for Disruptive Patient Behavior

Disruptive Patient Behavior is intimidating, threatening, dangerous and may pose risk of harm to other patients, employees or visitors. These behaviors include but are not limited to:

- Physical abuse: hitting, grabbing, spitting, slapping.
- Verbal abuse: verbal threats, name calling, racial/ethnic epithets, sexual harassment.
- Interrupting or interfering with safe medical care.
- Impeding the operations of the care environment through unnecessary use of resources.

The FYI Safety Risk Flag is one tool in Epic that is used to communicate risk for Disruptive Patient Behavior.

The FYI Safety Risk Flag:

- Provides early identification of patients who pose an unusual risk for violence. In certain circumstances, the flag may be placed based on disruptive behavior of family or visitors.
- Informs staff about the behaviors which resulted in the assignment of the flag and includes care suggestions to maintain safety for both the patient and staff.
- Assigned based on recommendation from Disruptive Patient Behavior and Staff Safety Committee. This group reviews Safety Reports, PI & PSI Reports, patient EHR, provider and leadership input to make the determination to assign a flag.
- Criteria used to determine flag assignment include previous background and history of violence, frequency and severity of episodes, likelihood of reoccurrence, provider and leadership input.

The Safety Reporting system:

- Use this tile to enter a Safety report specific to Disruptive Patient Behavior.
- Safety Report information helps guide the decision-making process to place a Safety Risk Flag.
- Staff should file a Safety Report to provide specific information leading to the disruptive event (such as delirium, difficult conversations, provision of care) as well as the impact of the event and immediate actions taken.

IDEA Grant Applications
Applications are now being accepted for 2019 IDEA Grants (Innovation, Design, Excellence, Awards). One or two grants of up to $5,000 will be awarded to individuals or teams within Nursing & Patient Care Services who have an idea to improve care and service. Proposals must align with our mission and be geared toward improving care-delivery, eCare, work flow, the work environment, the patient experience, staff engagement, or cost-containment.
Applications can be found on the Excellence Every Day website.
Applications are due June 29, 2018.
For more information, contact Mary Ellin Smith, RN, at 617-724-5801.

ACLS Classes
Certification: (Two-day program)
Day one:
September 14, 2018
8:00am–3:00pm
Day two:
September 24th
8:00am–1:00pm
Re-certification (one-day class):
August 8th
5:30–10:30pm
Locations to be announced.
Some fees apply. For information, contact Jeff Chambers at aclshp@partners.org.
To register, go to:
http://www.mgh.harvard.edu/emergencymedicine/assets/Library/ACLS_registration%20form.pdf.

Blum Center Events
Wednesday, June 20, 2018
MGH Cancer Center Series
“Supporting Your Child’s Resilience When You Have Cancer,” presented by Paula Rauch, MD

Thursday, June 21
“Alzheimer’s Disease: a Memory Problem or a Brain Disease?” presented by Bernard Hanseeuw research fellow

Thursday, June 28
“Prostate Cancer Survivorship: Managing Side-Effects After Prostate Cancer Treatment,” presented by Ajay Nehra, MD

Programs are free and open to MGH staff and patients. No registration required. All sessions held in the Blum Patient & Family Learning Center from 12:00–1:00pm.
For more information, call 4-3823.

AMMP Scholarships
The AMMP scholarship was established to assist AMMP members in their pursuit of degrees and other training at colleges and universities. Applications for 2018 AMMP Scholarships are available at http://AMMP.massgeneral.org or in the Employee Access Center in Bulfinch 107
Scholarship is open to benefits-eligible employees.
For more information, contact Nicholas Diamond at ndiamond@mgh.harvard.edu.

Conversations with Caregivers
An educational series sponsored by the Dementia Caregiver Support Program of the MGH Division of Palliative Care and Geriatric Medicine.

Wednesday, June 20, 2018
5:30–7:00pm
Haber Conference Room
“Promoting Resiliency, Strength and Support,” presented by Katie Brandt, director of Caregiver Support Services, MGH Frontotemporal Disorders.
For more information, call Barbara Moscovitz at 617-643-8809.

CAMTech Gun Violence Prevention Demo Day
June 15, 2018
2:00–4:30pm
MGH Simches Research Center
Join CAMTech at the Gun Violence Prevention Demo Day as teams pitch ideas to curb gun violence and improve the lives of survivors. All teams from the Gun Violence Prevention Hack-a-thon will have an opportunity to compete for a $10K grand prize and six months of support through the CAMTech Accelerator Program (CAP).
For more information, contact Nicholas Diamond at ndiamond@mgh.harvard.edu.

Nursing research opportunities
The Connell Nurse-Led Team Award for nurse scientists and an inter-disciplinary team to address a clinical problem related to patient-care outcomes. Funding of up to $25,000.
The National Institute for Occupational Safety and Health (NIOSH) Award focuses on workforce safety and health promotion. The award is for a nurse-scientist-led team looking at strategies to foster a healthy work environment.
For information, contact Staci Anne Goodridge at 617-643-0431, or go to: www.mghpcs.org/MunnCenter/
Recipients will be announced in September, 2018.
Applications are due by the end of June, 2018.

MGH recognized as one of DiversityInc’s top hospitals for diversity and inclusion

MGH was recently ranked one of the top hospitals for diversity by DiversityInc, a nationally recognized diversity and inclusion benchmarking organization that uses metrics-driven data to correlate best practices in: leadership accountability; talent pipeline and development; and supplier diversity. MGH has participated in the survey since 2010.

This year, MGH ranked eighth among Top Hospitals and Healthcare Systems, one of several categories tracked by DiversityInc that includes the top 50 companies for diversity, recruitment, and employee resources groups.

An awards dinner was held in New York City, last month to honor those recognized.

To learn more about the criteria for being named best companies for diversity, go to: DiversityInc.com.

For more information about MGH’s designation, contact Dianne Austin, manager, Workforce Diversity Program, at 617-726-5741.
